

US 27 AND SR 930 INTERSECTION IMPROVEMENT, ALLEN COUNTY - DES. 1401845

PROJECT DETAILS

The purpose of the project is to address both current and future traffic delays at the intersection of SR 930 and US 27, as delays are expected to nearly double over the next twenty years. Proposed improvements include additional left turn lanes in the westbound, eastbound, and northbound directions, an additional thru lane for southbound, and a right turn lane for northbound. The intersection will be widened to accomplish the needed improvements, while the pavement remaining in place will be resurfaced. Curb ramps have also been proposed in the southwest, southeast, and northwest quadrants that will offer a connection to the future Pufferbelly Trail. This includes a pedestrian refuge island in the southeast corner of the intersection.

The construction process will be completed in phases, with SR 930 and US 27 undergoing partial closures at varying times. Access to residences and businesses will remain open throughout construction. All current traffic movements will be maintained during each phase of construction and will not require a detour.

The acquisition of minimal permanent right of way (ROW) is anticipated to construct the proposed project. The current estimated amount needed is 1/10th of an acre of permanent ROW.

PROJECT NUMBER: 1401845
PROJECT STATUS: In Design
ANTICIPATED CONSTRUCTION START: Spring 2023
ESTIMATED CONSTRUCTION COST: Approx. \$2,500,000
